

Can you count on your servers?

Counting drinks is more complex than ever. It's time to count on ServSafe Alcohol™ Training.

How much alcohol is in each drink? That's a tough question. Especially today. Consider how many different drink recipes and glass sizes there are. Can you count on your bartenders and servers to understand the differences, and serve responsibly? Prepare them with ServSafe Alcohol from the National Restaurant Association Educational Foundation (NRAEF). This best-in-class responsible alcohol service training helps your front-of-the-house to count drinks, check IDs, recognize and prevent intoxication, and handle difficult situations. No wonder ServSafe Alcohol has been adopted by leading national chains and independent operations. That makes ServSafe Alcohol the right decision for your company, your customers and your community.

To order or learn more, contact your State Restaurant Association, your distributor, or the NRAEF at 800-765-2122 (312-715-1010 in Chicagoland) ext. 701. Or visit www.nraef.org.

Find out how much your servers are really serving. Visit www.nraef.org/countingdrinks/RB
